MaterialUI

PERSONAL PROJECTS

Instagram Clone App

- This is an Instagram-like app that allows users to upload their pictures, interact with people, upload videos, share with whoever they want to across channels.
- I developed this application using React and Node.js, with MongoDB as the database. I have also used some popular platforms like Cloudinary to enable storing users' information and images.
- I've worked on a lot of minor React projects, but this was my first time working with MongoDB database. It was challenging yet I was able to work on it with the help of online tutorials and articles.
- **Technologies:-** React Js, Redux, Node Js, Express Js, MongoDB

Zila Vikas Manch (A District Development Portal)

- Zila Vikas Manch is a District Development Portal. Here, users can create, modify, and delete accounts, can post any problem related to health, education, public work development, etc.
- In this particular project, I was actively involved in the entire design & development process, from module development, page & responsive creation to subsequent quality assurance.
- **Technologies:-** React Js, Redux, Node Js, Express Js, MongoDB

Memories App

- Memories App is a MERN Stack web application, where user can share travel experience.
- User can upload images with title and hashtags.
- It has feature like, update blog, delete blog, like blog.
- **Technologies:-** React Js, Redux, Node Js, Express Js, MongoDB

Personal portfolio

- Developed personal portfolio website using React component.
- Hosted Over netlify and still active.
