WORK EXPERIENCE

Software Engineer
Ison Xperiences PVT LTD

09/2022 - Present   *Noida, India*

Achievements/Tasks

- **iSON Bot:-**we are building conversational Ai chat bot named IsonBot. This is company own product, where user can upload document and train that document.
- This product is made for BPO industries to maximize its revenue by using conversational Ai.
- This chat bot can be trained on whatsapp and web .I have worked on authentication, Bot traning and chatModule system.
- Whatever questions asked by the user will be saved on chat Module section, when user will visit next time conversation will start from there only.

Software Engineer
ClassicInformatics PVT LTD

03/2021 - 04/2023   *Gurugram,India*

Achievements/Tasks

- **The Hive :-** Developed a web application for property cleaning services. Integrated google map Api for location of each property and used MaterialUI for best user interface.
- **Isomer.ai :-** Isomer a Biopharma web application, worked with two developers to create user interface using Reactjs, Redux. For the visualization of data in different format we have used, rechart, D3 chart and Reactflow for workspace development.
- **Leadgenautomation:-**Leadgenautomation managed web application for generating leads for different technical skills across the world. Worked on the dashboard part and filteration of leads in different scenario like, Date, Country, Owner etc. Used firebase, ReactJs, Redux, Material Ui.

EDUCATION

B.Tech(Computer Science Engineering)
Arya College Of Engineering & Information Technology

Jaipur, Rajasthan

SKILLS

React js | javaScript/TypeScript | Redux/Redux-saga

Node Js | Express js | MongoDB | MaterialUI/Antd

PERSONAL PROJECTS

Instagram Clone App

- This is an Instagram-like app that allows users to upload their pictures, interact with people, upload videos, share with whoever they want to across channels.
- I developed this application using React and Node.js, with MongoDB as the database. I have also used some popular platforms like Cloudinary to enable storing users' information and images.
- I've worked on a lot of minor React projects, but this was my first time working with MongoDB database. It was challenging yet I was able to work on it with the help of online tutorials and articles.

Zila Vikas Manch (A District Development Portal)

- Zila Vikas Manch is a District Development Portal. Here, users can create, modify, and delete accounts, can post any problem related to health, education, public work development, etc.
- In this particular project, I was actively involved in the entire design & development process, from module development, page & responsive creation to subsequent quality assurance.

TRANING & CERTIFICATIONS

Newton School Full Stack Development Program (04/2020 - 10/2020)

Full Stack Web Development (Both Frontend and Backend) and problem-solving.Participated in various coding contests organized during this internship.Worked on various projects like Tic-Tac-Toe game, Bomberman Game, CV using CSS FlexBox, Movie Portal, Calculator App.
